EDUCATION

DHARMSINH DESAI UNIVERSITY

B.Tech Information Technology

Nadiad, India

AUG 2023 - MAY 2026

GUJARAT TECHNOLOGICAL UNIVERSITY

DIPLOMA in Computer Engineering

Jamnagar, India

AUG 2020 - MAY 2023

WORK EXPERIENCE

Freelancer *FULL-STACK DEVELOPER*

JAN 2024 - FEB 2025

- Built [Toradle](#)'s frontend with React, adding fiat and crypto payments, wallet-based Web3 authentication, and real-time functionality using thirdweb, wagmi, RESTful API, and WebSocket.
- Developed a [real estate platform](#) using React and FastAPI enabling property listings, search, and lead generation, improving inquiry conversions.

PROJECTS

[SuiSign](#)

Sui Blockchain, Walrus(Decentralized storage), zkLogin, React

- Built SuiSign, a fully decentralized document signing platform leveraging **Sui, Walrus, and zkLogin**, enabling users to **create, send, and sign agreements** without centralized intermediaries, while **sponsoring transactions to offer a gasless experience for users**.
- Reduced document signing/storage **costs by ~67%** compared to centralized SaaS solutions like DocuSign.

[SynapseModel](#)

Polygon Blockchain, Fluence(decentralized computing), FastAPI, React

- Built a **decentralized AI model marketplace** integrating **blockchain, decentralized storage, and distributed computing** where anyone can spin up and try any model in a single click.
- Developed **smart contracts on Polygon** for model registry and **x402-based monetization**.

[Globtera](#)

Stellar, React, Typescript, Node.js, Prisma(ORM), Tailwind CSS, PostgreSQL

- Developed a decentralized micro-donation platform using **Stellar blockchain**, designed to **make donations accessible and fast across 100+ countries**.
- Enables organizations to register and post articles/blogs, allowing users to make direct donations through each post, **reducing average fund transfer time to organizations by ~30%** compared to traditional platforms.

ACHIEVEMENTS

- [Won Sui Overflow 2025](#) : Built **SuiSign**, a solo project during **Sui Overflow 2025 Global Hackathon**, winning **1st place in the Programmable Storage track** among **3,000+ developers and 600+ projects**; awarded **\$30,000 USD and \$10,000 AWS Credits** for this project.
- [Won EthGlobal Delhi Fluence Track](#) : Built **SynapseModel**, a decentralized AI model marketplace in **36 hours**, winning **\$1,500** among **1,600+ hackers**.
- [Won Stellar Indiathon](#) : Built **Globtera**, Awarded **\$500** for innovative use of blockchain technologies.
- [LeetCode](#) : solved **200+ problems**.

SKILLS

Programming Languages: Java, TypeScript, JavaScript, Solidity, Python

Web Technologies: React, Next.js, Node.js, Express.js, WebSocket, WebRTC, gRPC, OpenAPI

Cloud & Infrastructure: AWS, Docker, Kubernetes, Serverless Backends, Auto Scaling Groups, Monorepo

Distributed Systems & Observability: Kafka, Pub/Sub, Prometheus, Grafana

Fundamentals & Tools: Object Oriented Programming, Data Structures, DBMS, SQL, NoSQL, Vertical Scaling, Git, GitHub, VSCode, Postman
